## SPECIFICATION AMENDMENT

Please amend the paragraph beginning at page 4, line 1 as follows:

"FIG. 1 FIG. 2 shows an exemplary OFDM symbol with cyclic prefix partly corrupted by IS1 and the range of IS1-free sampling-window positions available for that symbol. As shown, the length of the OFDM symbol is represented by N+L, where the data part length is N and the cyclic prefix length is L; the length of the IS1-corrupted region of the cyclic prefix is represented by D and the IS1-free region of the prefix is L-D".
